

IZBrunch

Science meets Science

NETWORK-
EVENT AT
THE IZB

Thursday, 30 June 2022 | 11.00 to 13.00

Welcome / Moderation

Dr. Peter Hanns Zobel, Managing Director of the IZB

Topic: News from the IZB

Speaker

Prof. Magdalena Götz

Director of the Institute of Stem Cell Research at Helmholtz Zentrum München and Chair of Physiological Genomics at the the Ludwig-Maximilians-University Munich

Topic: A new approach for neuronal replacement therapy

The direct reprogramming of local glial cells into new neurons is a new and promising approach to replace dead neurons. This approach was discovered several years ago by Prof. Goetz. She will present the current status of this innovative approach to neuronal replacement therapy at the IZBrunch.

Speaker

Dr. MD PhD Alexander Gebauer

CEO Secarna Pharmaceuticals GmbH & Co. KG

Topic: LNAplus™ antisense oligonucleotides are effective and safe therapeutic modalities for a variety of diseases

The third generation of antisense molecules provides drug developers with a powerful intervention opportunity. Secarna operates a development platform that allows lead candidates against mRNA targets rationally in a semi-industrial process. This includes in-house bioinformatics analysis, high-throughput screening, and efficacy and safety assays. Secarna has six ongoing partnerships with companies and over ten academic collaborations.

Location:

Faculty Club G2B
At the Klopferspitz 21
82152 Planegg/Martinsried

Registration:

10.30 a.m. at the reception
of the CAMPUS AT HOME
